BRENO MOREIRA AMBROSIO

São José dos Campos – SP | Married | 31 Years Old | EU CITIZEN (Italy)
+55 (12) 98135-3729 | breno-moreira@hotmail.com | LinkedIn | CV Online | GitHub

Professional Objective

To join an international team where I can contribute my experience in front-end development—specifically with Angular—while expanding my knowledge in back-end development and artificial intelligence, all with the goal of continuous technical growth and contributing to the delivery of high-quality solutions.

Professional Summary

Senior Frontend Developer with 7+ years of experience, including 6+ years focused on Angular (versions 10 through 19). Experience in scalable architecture using Nx Monorepo, Design Systems with Storybook, performance optimization, and Signals. Extensive experience in betting platforms, banking, and back-office systems (covering profit/loss management and environment configuration). Skilled in mentoring, conducting code reviews, and establishing frontend standards.

Skills

- Angular 19
- TypeScript / RxJs / Signals
- Storybook Angular
- Nx Monorepo
- Claude / Copilot
- Jest
- Testing Library
- NestJS / Prisma

Experiences

Senior Frontend Angular Developer | Grupo Aposta Ganha

2022 – 2026 | **skills: Angular19, TypeScript, RxJs, Nx, Storybook, NestJS, Figma**

- Leadership in a war room setting for the migration of a betting platform to Angular 19, implementing Design System (with 20+ components documented in Storybook) used by 4 squads. Focused on performance and using Signals, OnPush ChangeDetection strategy, lazy loading, and monorepo architecture with Nx to organize development squads.
- Developed and maintained backend services using NestJS and Prisma to support the frontend.
- Mentored 2 developers, established coding standards, conducted code reviews, and managed CI processes.
- Implemented unit tests using Jest (Claude AI oriented) to increase test coverage from 10% to 70%.
- Developed and development of an Angular 15 backoffice system for managing profit/loss, games, and promotions.

Frontend Angular Developer | Act digital

2021 – 2022 | **skills: AngularJS, TypeScript, JavaScript, Figma**

- Development and maintenance of an Internet Banking system for Banco Bmg—a high-security environment serving thousands of account holders.
- Development of an Additional Card feature, covering everything from API integration to pixel-perfect delivery based on Figma designs.
- Focused on accessibility and performance improvements within a legacy environment.
- Mentoring a junior developer on best practices, code reviews, clean code, and Git Flow.

Frontend Angular Developer | Enforce

2020 – 2021 | **skills: Angular10, TypeScript, RxJs, Figma**

- Integrated system for managing non-performing corporate credit, consolidating data from multiple sources (assets, balances, investigations, confidential information).
- Frontend development using Angular 10, based on RxJS for orchestrating multiple data sources.
- Performance optimization for displaying large datasets, implementing pagination and lazy loading.
- Creation of dashboards and complex workflows to support legal decision-making (e.g., settlement proposals).

Junior Fullstack Angular Developer | SoluCX - Software para Gestão de Experiências

2019 – 2020 | **skills: Vue, TypeScript, Figma, NestJS, TDD, Jest, Quasar Framework**

- Development of a CX platform (NPS, surveys via email/SMS/kiosks) used by major clients.
- Frontend built with Vue + TypeScript; backend built with NestJS.
- Introduced and implemented a testing culture using TDD and Jest, enhancing the reliability of deliverables.
- Developed REST endpoints and generated customer experience reports/charts, following TDD and BFF (Backend for Frontend) methodologies.
- Initial development of a back-office project using the Quasar Framework and TypeScript

Education

MBA | Impacta tecnologia – Cloud Computing & DevOps

2023 – 2024

Computer Engineering | Etep - Centro Universitário

2014 – 2018

Computer Technician| Colégio Técnico ETEP

2009 – 2011

Certificates

Angular University - Angular Testing Masterclass (Angular 14)

2022 - Credencial

Angular University - Angular programming with RxJs (Angular 14)

2023 - Credencial

AWS Academy Graduate - AWS Academy Cloud Foundations

2023 - Credencial
